IDENTIFIERS	Certified Staff; Comprehensive Tests of Basic Skills; *New Mexico; New Mexico High School Proficiency Examination

ABSTRACT

This profile summarizes and analyzes data to provide a broad range of educational indicators of the operation and performance of New Mexico's 88 school districts. The profile looks at the dropout rate and student enrollment, including the number of students receiving public assistance, special education, and bilingual education. Also studied are: the pupil/teacher ratio and teacher loads in various grade levels; the number of certified staff, including degrees and years of experience; proficiency examinations and the number of graduates; and the results of standardized achievement tests (Comprehensive Tests of Basic Skills). Vocational education information is also reported. Section 1 of the document is a summary overview of the statewide data, gathered over a 3-year period. The data indicate that the number of New Mexico students is increasing as is the diversity of their needs. Forty-seven percent of the students are Anglo, 40% are Hispanic, and 10% are Native American. Of the teachers, about 70% are Anglo, 24.2% are Hispanic, 1.6% are Native American, and 1.2% are Black. The document includes charts and graphs to show both statewide performance and performance for each school district. (TES)

District Overview 22

The information presented in this document is an analysis/summary of data provided to the Evaluation, Testing, and Data Management Unit of the State Department of Education by other organizations. While the Evaluation, Testing, and Data Management Unit monitors incoming data for completeness, the extent to which conclusions and generalizations can be drawn is dependent on the accuracy of the information provided by the responsible organization.

INTRODUCTION

The Constitution of New Mexico provides for an elected and appointed State Board of Education to establish educational policy for elementary and secondary schools. The State Board appoints a superintendent of public instruction who serves as the chief administrative officer of the State Department of Education. Personnel within the Department of Education serve as staff to the State Board and are assigned monitoring, technical assistance, and policy development functions. Our public schools are organized into 88 independent school districts, each governed by a locally elected board of education. Within requirements established by state law and policy, our local school districts: establish budgets; employ staff; set local educational goals, strategies, and curriculum; implement programs; and evaluate the operation and performance of their schools.

The purpose of the New Mexico School District Profile is to provide a broad range of educational indicators, data which serve to describe the operation and performance of our school districts. The Profile was first published for the 1970-71 school year and has been produced in essentially the same form for the past three years.

The Profile contains three major sections. Section I provides a summary overview of statewide data. Section II contains a detailed listing of each variable used in this year's Profile along with a definition and source citation. Section III contains data for each of New Mexico's 88 school districts for the past three years. The data for each district are presented on the top sheet and a similarly arranged statewide data page is placed below each district page. This arrangement was selected to facilitate referencing district and state performance.

It is not the purpose of this publication to compare one district's "excellence" with another, either directly or by implication. These data will not tell how "good" or "bad" a district's program is, nor can any major generalizations be made about all districts from this information. The school districts of New Mexico are very diverse in community makeup and resources which can have a major impact on the data presented herein. The data should be used as indicators only and must be used in conjunction with a wider range of information sources before arriving at any judgements concerning the quality of education in a particular district or group of districts.

In this report we provide a series of educational indicators, data which describe the operation and performance of New Mexico's public schools over the past three years. These indicators have been selected to provide as broad a picture of our schools as possible given many practical limitations. The statewide summary data which appear on the page above have been organized into a series of tables which provide data on the operation and performance of our schools along the following dimensions: Student Enrollment, Pupil/Teacher Ratios, Certified Staff, High School Proficiency Results, Vocational Education, and Student Achievement Measures. These broad indicators are used, with supplementary data, in this section of the Profile, to provide a statewide overview. Section II of this report contains data definitions and source citations and Section III contains these data for each school district.

The number of students enrolled in our public schools is beginning to increase and the nature and needs of this population are quite diverse. Statewide student enrollment levels for the past ten school years are presented in Figure 1. While our schools have experienced a decline in enrollment since 1971, the 1982-83 school year saw a reverse in this trend. An inspection of the enrollment figures presented on the statewide Summary page above reveals that kindergarten enrollments have continued to increase from the 1981-82 school year low of 18,650 students to 23,108 students in the 1986-87 school year. We anticipate statewide enrollment will continue to increase over the next several years. During the 1986-87 school year, enrollments among our districts ranged from a low of 59 students to a high of 79,919 students.

The ethnic composition of our enrolled students is graphically illustrated in Figure 2. For the 1986-87 school year, 47.1% of our students were Anglo, 40.2% were Hispanic, 9.6% were Native American, and 3.1% were of other ethnic origins. U. S. Bureau of Census information indicates that 4% of our age five through seventeen population had limited English proficiency. Our state and federal bilingual education programs are designed to meet these special needs. New Mexico was the first state to formally implement such programs.

One indicator of improved educational performance is the schools' ability to reduce the percent of students who drop out of school each year. This "dropout rate" represents the percent of grade 9 through 12 students who discontinue their formal education prematurely each year. Statewide dropout rates for the past seven years are illustrated in Figure 3.

The number of students taught by each teacher has traditionally been accepted as one indicator of resources being made available in the teaching/learning process. Information addressing this matter is provided on the page above under the table heading "Pupil/Teacher Ratio." Educational Standards for New Mexico Public Schools (1987) defines grade grouping to be used in reviewing this information and specifies standards to be achieved. Statewide pupil/teacher ratio data for the past three years are presented graphically in Figure 4.

Since secondary school teachers teach many different students each day, teacher loads per day are used to describe the average number of secondary school students taught by these teachers. This information for the past three years is presented graphically in Figure 5 for both mid/jr. high schools and for senior high schools. Since high school enrollments have been declining over the past several years, the noticeable increase in teacher loads per day at this level may be due, in part, to shifting resources in an effort to meet increasing needs at the early elementary school grade levels. Issues of shifting existing resources and/or providing additional resources in anticipation of further increases in enrollments are currently under discussion by all concerned with the topics of pupil/teacher ratios, teacher loads, and with issues related to future teacher supply and demand.

Our schools employ a wide variety of educationally certified staff. For descriptive purposes, the certified staff can be divided into three groups by function; direct instruction (teachers assigned to instruct students), instructional support (librarians, counselors, and etc.), and administrators (superintendents, business managers, personnel directors, etc.). During the 1986-87 school year, 85.1% of our certified staff served direct instructional functions, 13.4% served instructional support functions, and 1.5% served administrative functions. These data are graphically illustrated in Figure 6. The table titled "CERTIFIED STAFF" on the page above contains the total number of certified staff of our schools for the last three years and provides information on the ethnic make-up of our teaching staff, the percent of our teaching staff with a Master's degree or higher and average years of teaching experience possessed by our teachers.

In 1977, the New Mexico Basic Skills Plan was implemented. This plan defines a set of life competencies and basic skills to be achieved by our students; it sets policy to guide school districts toward effective instructional and remedial strategies; and it sets in place evaluation systems to monitor student progress.

As part of the Basic Skills Plan, our schools administer locally developed "checkpoint" assessments to monitor student progress through the elementary and secondary grades. These checkpoint assessments lead to a statewide objective test and a state-required writing appraisal. Students who demonstrate proficiency on both of these examinations prior to graduation, are awarded a gold seal diploma. The outcome data which result from these efforts are provided on the page above in the table titled "HIGH SCHOOL PROFICIENCY EXAMINATION."

Students have their first formal opportunity to demonstrate proficiency, as measured by the objective test, in the spring of their 10th grade year. For the 1986-87 school year, 90.0% of the tenth graders tested passed the examination. Students who do not demonstrate proficiency while in the tenth grade may take the exam again in grades 11 and 12. This objective test was first administered in 1977. Data on the percent of all students (10th, 11th, and 12th graders) who passed the objective test each year are presented in Figure 7.

The Basic Skills Plan also specifies writing skills to be mastered and delineates writing tasks to be used to assess student proficiency. As with the objective test, students have more than one opportunity to demonstrate writing proficiency prior to graduation. Available data indicate that 96% of our graduates demonstrate required writing proficiency. For the 1986-87 school year, 94% of our graduating students were awarded a gold seal diploma.

The ethnic composition of the teaching staff is graphically illustrated in Figure 8. For the last school year, 70.1% of the teachers were Anglo, 24.2% were Hispanic, 1.6% were Native American, and 1.2% were Black.

Vocational education programs equip students with employment related skills and experiences necessary for life. The data presented on the page above under the title "VOCATIONAL EDUCATION" provide information on the amount of skill and exploratory classes available to students. For the 1986-87 school year, 13.1% of all classes taken by students were vocational classes; 2.6% were skill development classes; and 10.5% were vocational exploratory classes.

Our schools establish a wide array of goals and objectives to be achieved through the educational process. The subject matter learned by students, and the attitudes and abilities developed are the primary outcomes of education. On the preceding narrative page the High School Proficiency Examination results were presented and reviewed. On this page, other student test results are reviewed. Test results represent one means of measuring some of the primary outcomes of education. Test results are limited, however, in that they measure only a small sample of what students know in the subject areas for which the tests are designed. More important, these tests do not measure, at all, much of the subject matter, attitudes, and abilities learned and developed. A student's ability to read, use prescribed language practices, perform mathematical computation, and use math to solve problems are important prerequisite skills to many of the higher order skills and abilities toward which schools and students strive.

The Statewide Standardized Testing Program uses the Comprehensive Tests of Basic Skills (CTBS) to annually assess acquisition of reading, language, and math skills among our third, fifth, and eighth grade students. Statewide, national percentile scores resulting from these tests over the past three school years are presented on the above page in the table titled "ACHIEVEMENT MEASURES." These scores are also presented graphically in Figure 9 for grade 3, in Figure 10 for grade 5, and in Figure 11 for grade 8. Over the past three years, the average scores for New Mexico students have increased or remained the same. New Mexico students scored above the national norm-group average in all areas tested, at all grades tested. The CTBS, Form U, national norms used for comparison were obtained in 1981. The reading and language scores are notable given the special language backgrounds of students in our state. The U.S. Bureau of Census estimated that in 1980, 36.6% of New Mexico children ages 5 to 17 spoke a language other than English in their homes, the highest proportion of any state. Our CTBS testing data indicate that as many as 20% of our students come from homes where a language other than English is the primary language spoken at home. CTBS test results in science and social studies, though not a required part of the Standardized Testing Program, are also available for most of our students at these three grade levels.

New Mexico students planning to attend college most frequently take the American College Tests (ACT) as part of the college entrance requirements. ACT results for New Mexico students over the past three years are also presented in the above table titled "ACHIEVEMENT MEASURES." In general, New Mexico statewide average score results are slightly lower than scores for students nationally.

SECTION II

DEFINITIONS AND SOURCE CITATIONS

This section of the Profile contains definitions and source citations for all of the educational indicators (data) which appear in this report. These definitions and source citations are arranged by major table headings. For example, definitions and source citations for data which appear in the table titled "Student Enrollment" are presented together under the outline heading "Student Enrollment." The definitions which are provided, are written to reflect how the data were treated to produce "district level" results. State level results were produced using essentially the same process and the same data.

I. Student Enrollment

A. Number of Students - Grades K, 1-6, 7-12, (Sp. Ed. (C & D Level)), and Total. These data reflect the actual student enrollment as of the 40th day of school in each grade or group of grades.
Source: SOE (40-Day Membership Report)

B. Percent of Students-Chapter I (Title I). This value is the percent of the student body that receives services under Chapter I. This value is derived by dividing the number of students served using Chapter I funds by the total 40-Day Average Daily Membership for the district.
Source: SOE (40-Day Average Daily Membership Report)
SDE Chapter I Office (Number of Chapter I Students)

C. Percent of Students-Special Education. This value is the percent of the student population that receives C and D level Special Education services. This value is derived by dividing the number of C and D level Special Education students by the total number of students reported to be enrolled in the district on the 180th day of school. The reader should note that while some districts may have no students requiring C or D level services, all New Mexico school districts have A through D level services available as needed.
Source: SOE (180-Day Membership Report)

D. Percent of Students-Bilingual Ed. This value reflects the number of students receiving services from federal or state operated Bilingual Education programs expressed as a percent of students' enrollments in grades 1, 2, and 3. This value is derived by dividing the number of students served in these programs by the sum of the 180th Day Membership for grades 1, 2, and 3. Values greater than 100% indicate that federal and/or state Bilingual Programs extend beyond the third grade.
Source: SDE Office of Bilingual Education (number of students)
SOE (180-Day Membership Report)

E. Dropout Rate. This value is the percent of students in grades 9-12 who drop out of school each year. This value is derived by dividing the total number of dropouts in the district by the number of dropouts plus the number of students enrolled in the 180th day of school.
Source: SDE Evaluation Unit District Survey Data

F. Student Body-Percent-Anglo, Hispanic, and Native Am. This represents the primary ethnic make-up of the student body in grades 9 through 12 each year. Each ethnic percent is derived by dividing the number of students in each ethnic category by the 180-Day Membership in grades 9-12. These figures may not add to 100 percent due to students being reported in other ethnic categories.
Source: SDE Evaluation Unit District Survey Data

G. Mobility Rate. This value is the percent of the student body moving into or out of the school district each year. The method used to calculate this value is to add all students who enter the district after having been previously enrolled in another district or state to the number of students who withdrew during the year, subtract those who subsequently returned, and divide the results by the 180th Day Membership.
Source: SDE Evaluation Unit District Survey Data
SOE (180-Day Membership Report)

II. Pupil/Teacher Ratio

A. Pupil/Teacher Ratio for Grade K. This value represents the average number of kindergarten students taught by each teacher. This ratio is derived by dividing the total number of kindergarten students by the total number of FTE kindergarten teachers in the district.
Source: SDE Personnel Report Form (SDE 810)

B. Pupil/Teacher Ratio for Grades 1-3. This value represents the average number of grade 1-3 students taught by each teacher in these grades. This ratio is derived by dividing the total number of students assigned in grades 1-3 by the number of FTE teachers assigned to teach in these grades.
Source: SDE Personnel Report Form (SDE 810)

C. Pupil/Teacher Ratio for Grades 4-6. This value represents the average number of grade 4-6 students taught by each teacher in these grades. This ratio is derived by dividing the total number of students assigned in grades 4-6 by the number of FTE teachers assigned to teach in these grades.
Source: SDE Personnel Report Form (SDE 810)

D. Teacher Load/Day-Mid/Jr. This value represents the average number of students taught by mid/jr. high school teachers in the district each day. This value is derived by dividing the total number of students assigned to mid/jr. high school classes in the district each day by the total number of FTE teachers assigned to teach these classes. These data do not include classes such as band, music, physical education, or special education.
Source: SDE Personnel Report Form (SDE 810)

E. Teacher Load/Day-High. This value represents the average number of students taught by high school teachers in the district each day. This value is derived by dividing the total number of students assigned to high school classes each day by the total number of FTE teachers assigned to teach these classes. These data do not include classes such as band, music, physical education, or special education
Source: SDE Personnel Report Form (SDE 810)

F. Overall P/T Ratio. This value represents the districtwide ratio of pupils to teachers regardless of grade or type of teaching assignment. This ratio is derived by dividing the total student enrollment in grades K-12, including special education students, by the total number of FTE teachers.
Source: SDE Personnel Report Form (SDE 810)

III. Certified Staff

A. Total FTE Staff. This value represents the total number of all full-time equivalent certified staff employed by the district (teachers, administrators, and instructional support personnel).
Source: SDE Personnel Report Form (SDE 810)

B. Teaching Staff Percent Anglo, Hisp., and Nat. Am. These values reflect the primary ethnic make-up of the teaching staff. These values are derived by dividing the number of teachers in each ethnic category by the total number of teachers in the district. In most cases, these values do not add to 100 percent due to teachers reported in other ethnic groups and to missing data.
Source: SDE Personnel Report Form (SDE 810)

C. Teaching Staff % MA Plus. This value is the percent of teaching staff who possess a Master's or higher degree (Ed. Specialist, Ed.D., Ph.D.). This value is derived by dividing the number of teachers who have been reported as possessing a Master's degree or above by the total number of teachers employed.
Source: SDE Personnel Report Form (SDE 810)

D. Teaching Staff-Years Experience. This value is the average number of years of teaching experience for all teachers in the district. This figure is derived by dividing the total years teaching experience (in-state and out-of-state) by the total number of teachers.
Source: SDE Personnel Report Form (SDE)

IV. High School Proficiency Examination and Graduates

A. Objective Test-Percent Passing Grade 10. This is the percent of 10th grade students who achieved a passing score on the High School Proficiency Examination objective test. This value is derived by dividing the number of tenth grade students who passed the objective test by the total number of tenth grade students tested.
Source: SDE Evaluation Unit HSPE Data

B. Graduates-% Passing Objective Test. This value is the percent of students graduating from the school district each year who achieved passing scores on the High School Proficiency Examination objective test. This value is derived by dividing the number of graduating students who passed the exam by the total number of students graduating. Students usually have three opportunities (grades 10, 11, and 12) to achieve a passing score on this test.
Source: SDE Elementary/Secondary Education Unit
District Survey Data

C. Graduates-% Passing Writing Test. This value is the percent of students graduating from the school district each year who achieved passing scores on the writing assessment portion of the Proficiency Exam. This value is derived by dividing the number of graduating students who passed the writing exam by the total number of students graduating.
Source: SDE Elementary/Secondary Education Unit
District Survey Data

D. Graduates-% Gold Seal. This value represents the percent of graduating students who achieved a passing score on both the objective and writing portions of the High School Proficiency Exam and, thereby, received a gold seal on their high school diploma. This value is derived by dividing the number of graduates who received a gold seal by the total number of students who graduated.
Source: SDE Elementary/Secondary Unit
District Survey Data

E. Number of Graduates. This value is the number of students who received a diploma during the school year.
Source: SDE Evaluation Unit District Survey Data

V. Vocational Education

A. Voc Classes as a Percent of all Classes-Skills. This value represents the number of student class hours offered in Voc. Ed. skill development classes expressed as a percent of the total number of student class hours offered for all classes. This value is derived by summing the number of Voc. Ed. skill development student class hours offered and dividing by the sum of the number of all student class hours offered. These data are calculated for all mid/jr. and high school class offerings except Special Education.
Source: SDE Personnel Report Form (SDE 810)

B. Voc Classes as a Percent of all Classes-Exploratory. This value represents the number of student class hours offered in Voc. Ed. exploratory classes expressed as a percent of the total number of student class hours offered for all classes. This value is derived by summing the number of Voc. Ed. exploratory student class hours offered and dividing by the sum of the number of all student class hours offered. These data are calculated for all mid/jr. and high school class offerings except Special Education.
Source: SDE Personnel Report Form (SDE 810)

C. Voc Class Hours Available per Student-Skills. This value represents the number of hours of Voc. Ed. skill classes available to each student enrolled in the district. It is derived by dividing the number of Voc. Ed. skill class hours offered in the district by the number of students enrolled in the district. For each district, the enrollment (6-12, 7-12, etc.) is determined by the grade at which Voc. Ed. classes are first offered.

SOE (40-Day Membership Report)

D. Voc Class Hours Available per Student-Exploratory. This value represents the number of hours of Voc. Ed. exploratory classes available to each student enrolled in the district. It is derived by dividing the number of Voc. Ed. exploratory class hours offered in the district by the number of students enrolled in the district. For each district, the enrollment (6-12, 7-12, etc.) is determined by the grade at which Voc. Ed. classes are first offered.

VI. Achievement Measures

A. CTBS National Percentile Scores Grades 3, 5, and 8. The Statewide Standardized Testing Program requires that all students enrolled in grades 3, 5, and 8 be tested each spring using the Comprehensive Tests of Basic Skills, Form U (CTBS-U). This battery of tests includes, at each grade level, tests for reading, language, mathematics, and a combined score labeled battery total. The test results for New Mexico students are presented using national percentile scores. A national percentile score indicates what percent of a large national sample of students scored lower than New Mexico students when each group took the test. For example, our 1986-87 third grade students' reading test results produced a national percentile score of 54%. The interpretation of this score is that the overall reading score for New Mexico third grade students last year was better than the reading score achieved by 54 percent of all the students who took the test in the national sample.
Source: SDE Evaluation Unit CTBS Test Data

B. American College Testing Results (ACT). Most New Mexico students who plan to attend college take the ACT as part of admission requirements. The ACT provides score results in the areas of language, math, science, social studies, and a combined score labeled composite. These scale scores can range from a high of 36 to a low of 1. The scores reported are average scale scores for last year's graduating class. These results will include both the scores for seniors who took the test last year and for juniors who took the exam year-before-last.
